

Rameş Aliyev

My name is Rameş Aliyev (IPA: [ɾameʃ alijev]), and I'm a former Software Engineer who mostly experienced in Web Technologies. I've worked in various companies as a senior or a lead engineer. For the last couple of years, I returned to academia to improve my theoretical background.

These days, I'm studying Computer Science at Yildiz Technical University as an initial step of my becoming a AI Scientist journey. I mostly interested in Computer Vision and Deep Learning in general.
